Teacher Workshop in the ACE Basin

From Seeds to Shoreline: Youth Salt Marsh Restoration Program

From Seeds to Shoreline (S2S) is a school program in which students engage in hands-on education that includes seed collection, germination, cultivation and planting of *Spartina alternifora*, commonly known as Smooth Cordgrass. The program creates an opportunity to learn about the importance of saltmarsh ecosystems while participating in a community service-learning project with emphasis on environmental stewardship. From January to June 2011, more than 10,000 *Spartina alterniflora* plants were seeded as part of the S2S effort. Attend the first ever S2S Teacher Workshop and learn more about the only student driven wetland restoration project in the state!

Teacher Workshop Details:

Where: McKenzie Field Station, Bennett's Point, ACE Basin
When: June 11 to 13, 2012
Who: 3rd - 12th grade teachers, earn renewal credits
Cost: FREE room & board, transportation NOT included

Workshop Activities Include:

- Explore beautiful ACE Basin
- Experience salt marsh and oyster reef habitat
- Address state science standards
- Gain resources for your classroom
- Develop plan for S2S involvement based on your schools needs

Deadline for registration is April 20, 2012

Register for the 2012 S2S Teacher Workshop at:
